CS471 - Lab 2

Rudi Aleidan

Part 1: Django

Task 1: Installing Django

Successfully installed Django and created a project & created a virtual environment for the project.

```
Rudi djangoenv ❯ source bin/activate
(djangoenv) Rudi djangoenv ❯ python3 -m django --version
6.0.2
```

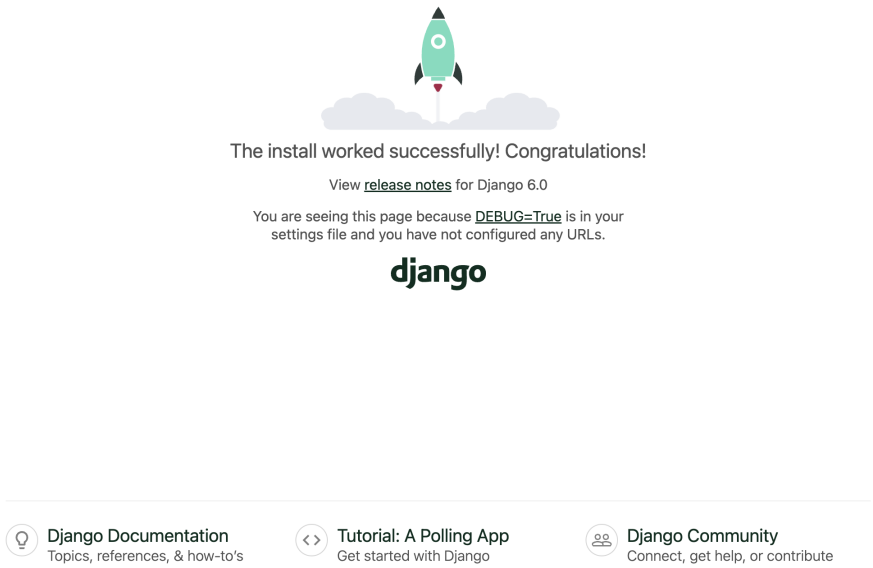
Task 2: Creating a Django Project

Successfully created a Django project and ran the development server.

```
(djangoenv) Rudi libraryproject ❯ python manage.py runserver
Watching for file changes with StatReloader
Performing system checks...

System check identified no issues (0 silenced).

You have 18 unapplied migration(s). Your project may not work properly until you apply the m
sions.
Run 'python manage.py migrate' to apply them.
February 14, 2026 - 21:20:23
Django version 6.0.2, using settings 'libraryproject.settings'
Starting development server at http://127.0.0.1:8000/
Quit the server with CONTROL-C.
```



Task 3: Configure the Application

in `settings.py` file, added the application to the `INSTALLED_APPS` list.

```
INSTALLED_APPS = [
    // ...
    'apps.bookmodule',
    'apps.usermodule',
]
```

Part 2: Git

Task 1: Local git repository

Initialized a local git repository, added files, and made commits.

```
(djangoenv) Rudi libraryproject ❯ git status
On branch master
Your branch is up to date with 'origin/master'.

nothing to commit, working tree clean
```

Task 2: Remote git repository

Created a remote repository on GitHub and pushed the local repository to GitHub.
